

SciGirls Rocks!

Here's what people are saying about the SciGirls program.

"I love SciGirls! It's a blast and we do so many awesome projects. My favorite SciGirls trip was to the engineering school at SIU [Southern Illinois University]. We got to build hovercrafts and see one in the lake. And we are doing robots, making them spin!"

—Meredith, age 12

"All week the girls worked on building their own rockets, which they launched in front of LPB studios. It was the culmination of all their hard work and the girls loved the thrill of lift off!"

—Louisiana Public Broadcasting, Baton Rouge, LA

"SciGirls was one of the most effective outreach projects WSIU ever conducted. This project captured the attention, imagination, and support of everyone it touched, from the educators and parents to the media and community leaders. The SciGirls themselves LOVED it and begged for it to continue."

—WSIU Public Broadcasting, Carbondale, IL

"An Adirondack Acre empowered its participants. The fact that the project was only offered to girls made them feel as though they could be in control and take over a project that might typically be lead by boys."

—Mountain Lake PBS, Plattsburgh, NY

"I like making robots—it was so much fun! My partner Robyn and I made our robot go around in a circle for 8 seconds. I'm glad I joined SciGirls or I wouldn't have a chance to do this."

—Ciera, age 13
