

Science At The Zoo: Animal Feet!

Webbed feet, padded feet, feet with claws, feet with feathers.
Why do different animals have different feet? When you go
through the zoo, take a look at each animal's feet.

	<u>Animal</u>	<u>Feet</u>
Example:	Crane	toed, clawed
1.	_____	_____
2.	_____	_____
3.	_____	_____
4.	_____	_____
5.	_____	_____
6.	_____	_____
7.	_____	_____
8.	_____	_____

Think About It

Now think about this: How do each animal's feet help it live in its environment? Put each animal from page 11 into the category that best describes how its feet help it live in its environment. You can put an animal into more than one category.

Hunt	Fish
Swim	Dig
Jump	Climb
Defend Themselves	Hold things
